

## Frozen Semen Contract

<b>Client:</b>	<b>Phone:</b>
<b>Email:</b>	<b>Cell:</b>

The Paul Schockemoehle Hengsthaltung GmbH (PS) agrees to supply the client with frozen semen for the artificial insemination in accordance with the following details and on the basis of the attached terms and conditions. The client agrees to accept the delivery. The contract only allows the insemination of the declared mare, no further gestations are allowed.

**REQUIRED INSEMINATIONS:**

<u>Name of Stallion</u>	<u>Number of Inseminations/doses</u>	<u>Price</u>
1	2	\$

**VETERINARIAN who will carry out the insemination:**

Name, address and phone number of the veterinarian \_\_\_\_\_

<u>NAME OF THE MARE</u>	<u>REGISTRATION #</u>	<u>CHOSEN STALLION</u>
1		

Terms and conditions for the sale of PS semen (The contract is only valid for one gestation)

1. The semen is intended for the successful gestation by means of insemination of the specified mare (or any other mare that you have notified PS of in writing) and remains the in the control of Paul Schockemoehle Hengsthaltung GmbH (PS). An implanted or frozen embryo is considered a gestation at the time of implantation/freezing.
2. If you have achieved a successful gestation with the semen (after 28 days) and wish to use the rest of the semen for a further insemination on another mare, you must sign another contract with PS first.
3. By signing this contract, you confirm and direct your veterinarian/insemination technician to use a complete insemination dose according to the number of straws given by us when breeding your intended mare.
4. Your vet/tech is also asked to document breeding date, number of straws used, noting the collection date and the subsequent 14 and/or 28-day pregnancy check and the final reporting of outcome with vet/tech signature.
5. There will be no shipment of doses without your signed agreement agreeing to our terms of control and complete dose usage per insemination of your mare.
6. If you have achieved a successful gestation with the semen (after 28 days) and do not wish to use the rest of the semen for a further gestation (see point 2), then you must sign a new contract. If you wish to store the semen to use another year, you must sign a new contract to use that semen.
7. The client is not authorized at any time to sell or give semen to another person or persons in order to achieve a gestation without the prior consent of PS.
8. The client must inform PS if he/she intends to transport the semen from the initial veterinary clinic to another one.
9. Empty used straws must be sent back to the supplier. Alternatively, you can provide a photo of the used straws clearly showing the data.
10. If the client violates a provision of these terms and conditions of sale, PS will impose a contractual penalty of 2500 EUR.
11. ICSI is only allowed after prior agreement is made with PS. For this purpose, a separate invoice will be sent for every embryo, regardless of whether it is frozen or transferred to a receiving mare.
12. The client agrees that PS is authorized to receive information directly from their veterinarian regarding performed inseminations, ET and ICSI results and authorize release to PS the information about the ICSI results obtained.
13. If the mare is not in foal with the semen for any reason, the owner of the mare has no rights of recourse against PS.

Please fill in and sign this contract after reading the attached terms and conditions. By signing this document, you agree to the terms and conditions. Keep a copy and send a copy back to Superior Equine Sires/SES. In default of payment of outstanding amounts, interest may be charged (currently 20%).

Signature of the client (mare owner)

Signature of veterinarian/insemination technician
